ABOUT US

A technology partner for growing businesses

TechVanta Labs is a technology solutions company delivering innovative and scalable digital products for businesses across India. We specialize in custom software development, mobile applications, modern websites, and enterprise-grade platforms tailored to specific business needs.

With a strong focus on innovation, quality, and client-centric delivery, we help organizations streamline operations, improve efficiency, and accelerate digital transformation — from business automation and ERP systems to advanced web and mobile applications.

MISSION

To empower organizations with intelligent, scalable digital solutions.

VISION

To be a trusted partner for a digital-first world.

Website Development

Modern, responsive websites focused on usability and brand presence.

- Responsive UI/UX design
- SEO-friendly structure
- Fast, optimized performance

Mobile Applications

User-friendly apps designed for engagement and productivity.

- Android and iOS apps
- Business and utility apps
- Long-term support

Digital Solutions

Technology services that improve efficiency and visibility.

- End-to-end digital services
- Business-oriented solutions
- Cost-effective delivery

Creative Branding

Professional branding across digital and offline platforms.

- Graphic and promotional design
- Outdoor and print branding
- Consistent brand identity

Digital Marketing

Campaigns focused on leads, visibility, and engagement.

- Social media marketing
- E-commerce integrations
- Lead generation strategies

EXPERTISE

Technology expertise

Business Intelligence

Dashboards, automated reporting, and trend analysis that turn data into decisions.

Cloud Computing

Cloud migration and scalable, optimized infrastructure management.

Cyber Security

Threat prevention, risk and compliance management, and continuous monitoring.

Business Analytics

Predictive analytics, customer insights, and operational performance analysis.

App Development

Scalable web and mobile application architecture with user-centric design.

Digital Transformation

Industry-focused, future-ready systems for corporate, government, and finance.

PRODUCT PORTFOLIO

Our Products

Business-focused products built with modern technology, secure architecture, and user-centric design.

VoiceCraft AI

VOICE AI

AI voice agent platform that answers and places business calls in 12 Indian languages besides English — qualifies leads, books appointments, and hands the call to your team when it matters.

TRAI and DND compliant campaigns · Call recordings and transcripts · CRM sync

voicecraftai.techvantalabs.com

MyMeet

MEETINGS

Smart HD video meetings with automated attendance tracking for teams, educators, and organizations.

Attendance and session tracking · Live streaming · In-meeting chat · Exports and reports

mymeet.techvantalabs.com

TicketDesk24

HELPDESK

AI-powered helpdesk that centralizes support workflows, SLAs, automation, and team collaboration.

AI ticket categorization · SLA tracking and escalations · Kanban workflow

ticketdesk24.com

Lekha ERP

PHARMACY

Offline-first ERP built only for pharmacy and medical stores — counter billing, stock, expiry, and accounts in one place.

GST billing · Batch and expiry tracking · Schedule H/H1 register · GSTR-1/3B reports

techvantalabs.com/products/lekha-erp

Personal Desktop Screen

WINDOWS

(Formerly Multi-Desktop Manager.) Keeps several Screens on one Windows PC — each with its own folder, wallpaper, and icon layout — with IP Chat and secure file transfer on the local network.

One-click switching · Private Screens per Windows user · E-mail a Screen as ZIP
